Read the following instruction
before use.

NAME OF PARTS

Always cover the Pad
with the Film when the
Stamp is not used.

How to Use the Supports

Attach the Clip to the edge of the Grip Table
and turn the Clip to the outside.

<Contents>

- B6 Stamp (main body) 1 unit
- Supports 4 pieces
- Owner's Guide 1 copy

How to use Print Gocco B6 Stamp

1 Master Making

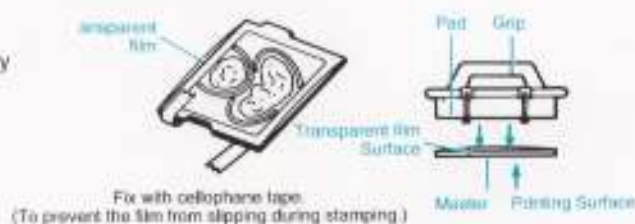

- Prepare an original and make a master with your Print Gocco.
 - Do not remove the original from the master after making master.
 - Peel off the transparent film of the master and apply a sufficient quantity of the ink.
- ⇨ The above mentioned method is same as Print Gocco. Read the manual of Print Gocco for details.

For clearer stamping, use Riso Hi Mesh Master and Riso Hi Mesh ink.

2 Attach the master

- Replace the transparent film of the master, and fix the end securely with cellophane tape.
- Peel off the protective film from the pad, and place the B6 stamp on top of the master. It will stick by itself.

Fix with cellophane tape
(To prevent the film from slipping during stamping.)

3 Stamping

- Peel off the original pasted on the master.
 - First make a test-print on the cloth and check the appearance of the ink, or other conditions, and then, print.
- ⇨ Always attach a vinyl sheet to the master when you pause while printing so that the ink will not dry.
